WORK EXPERIENCE

Medical Mutual of Ohio

July 2022 – Present

Software Developer II | September 2023 - Present

Brooklyn, OH

- Promoted from Software Developer I due to eagerness to learn and proven ability to go the extra mile to ensure commitments are met to an industry standard
- Collaborate closely with the Tech Lead to devise optimal strategies and implementation techniques for our product
- Proactively identify and document emerging issues, resolving them promptly while simplifying complex information for effective communication with stakeholders
- Mentor and provide technical guidance to junior developers, fostering their growth and development within the team
- **Notable Achievements:**
 - Implemented Azure B2C identity provider for a new application
 - Refreshed our corporate homepage to create reusable components with styles and templates while cleaning up the code base along the way

Software Developer I | July 2022 - September 2023

- Worked on an Agile Scrum team to support development and maintenance on new and existing applications that complies with enterprise security and coding and accessibility standards using HTML, CSS, Javascript, and .Net
- Develop code through Test Driven Development including unit, integration and acceptance tests
- Learned new technical concepts, skills and languages as needed

ADAMHS Board of Cuyahoga County

May 2021 – July 2022

Database Specialist

Cleveland, OH

- Designed, developed and maintained automated Extract, Transform and Load processes on data extracts and reconciliation files by established deadlines
- Responsible for day-to-day database management operations including configuring, administering, documenting, monitoring and maintaining databases
- Maintained user database access and security privileges for staff and implemented a database backup solution
